

INVEST IN PEOPLE. When businesses owners commit to giving annually to Project Self-Sufficiency, they are changing the future for our Participants by ensuring higher long-term income potential through the development of career paths for individuals struggling with sufficient employment.

Helping single parents achieve higher education is paramount for the economic vitality of our community.

Over 2,400 households living in poverty in Larimer County are single-parent households, **earning \$13,290 annually or less - \$43,297 less** than what they need to thrive without assistance.

CHANGE THE COURSE FOR MULTIPLE GENERATIONS. The most remarkable trend is seen in the power of the next generation. Project Self-Sufficiency graduates have reported their children follow in their positive footsteps with strong attention to K-12 schoolwork, pursuit of secondary degrees, even seeking degrees in legal, medicine and other advanced specialties.

OUR POWER IS PROVEN. Highly trained advisors use a methodology based on best-practice research. As such, our outcomes for individuals in our participant families are exponentially improved for decades longer, making Project Self-Sufficiency a recognized program for multi-generational impact.

GIVING IS A BIG DEAL FOR BUSINESSES OF ALL SIZES. When our local business owners share their financial commitment with Project Self-Sufficiency families, we know this is a great sacrifice in financial investment. We love our donors and can't wait to show you our appreciation.
